

Welcome to Haven PDF

A sample document — try the tools on this file

This PDF runs entirely in your browser. Nothing is uploaded — your files never leave your device. Use it to explore everything Haven PDF has to do, then open your own files with full confidence.

Things to try

- **Add text** — pick the Text tool, then click anywhere on the page.
- **Highlight** — select the highlighter and drag over a line.
- **Sign** — open the signature tool and draw your signature.
- **Redact** — cover sensitive text — it is fully removed (if export).
- **Pages** — reorder, rotate, split or merge from the side panel.
- **Export** — download as PDF, images or text — or compress & protect.

Sample content

This second page gives multi-page tools something to work with: by default, no margins, pages, flaps to turn this page, or flip up to place two pages per sheet.

You can also select the full of the document, run OCR on scanned pages, add page numbers, a watermark, or a header and footer across every page.

When you are done, the Download menu offers final compression (keeps text selectable), image export, and password protection with permissions — all contained locally in your browser.
