

Welcome to Haven PDF

A sample document — try the tools on this file.

This PDF runs entirely in your browser. Nothing is uploaded — your files never leave your device. Use it to explore everything Haven PDF can do, then open your own files with full confidence.

Things to try

- **Add text** — pick the Text tool, then click anywhere on the page.
- **Highlight** — select the highlighter and drag over a line.
- **Sign** — open the signature tool and draw your signature.
- **Redact** — cover sensitive text — it is truly removed on export.
- **Pages** — reorder, rotate, split or merge from the side panel.
- **Export** — download as PDF, images or text — or compress & protect.

Free · no sign-up · works offline · your files stay on your device.

Sample content

This second page gives multi-page tools something to work with: try Split to separate pages, Rotate to turn this page, or N-up to place two pages per sheet.

You can also extract the text of this document, run OCR on scanned pages, add page numbers, a watermark, or a header and footer across every page.

When you are done, the Download menu offers lossless compression (keeps text selectable), image export, and password protection with permissions — all computed locally in your browser.
